

Nicolas Manel PhD

INSERM Director of Research, Institut Curie

Nicolas Manel was trained in the Sitbon lab in Montpellier and the Littman lab at NYU. He now leads the Innate Immunity lab at Institut Curie-INSERM, Paris, France. His lab focuses on understanding how cells recognize viruses, how such recognition intersects with viral replication and what are the consequences for the immune system. Recently, his lab has identified cGAS and NONO as critical innate immune sensors of HIV, and revealed a Trojan horse mechanism of innate immune activation by viruses.
